

The Threat of Inland Flooding

What can you do?

- When you hear *hurricane*, think *inland flooding*.
- Determine whether you live in a potential flood zone.
- If advised to evacuate, do so immediately.
- Keep abreast of road conditions through the news media.
- Move to a safe area before access is cut off by flood water.
- Do not attempt to cross flowing water. As little as six inches of water may cause you to lose control of your vehicle. Two feet of water will carry most cars away.
- Develop a flood emergency action plan with your community leaders.
