

## Eversource 115-kV Transmission Project Update

Greetings!

Eversource's contractor BOND Civil & Utility Construction and their subcontractors (ET&L Construction, M-O-N Landscaping Inc., and Moosehead LLC) are continuing to work on the 115-kilovolt (kV) Underground Transmission Line Project in Hudson and Sudbury. Crews are working from Monday through Friday this week. There will be **no work on December 26 and January 2, 2023**. Construction is not expected to interrupt electric service.

Project Route Map

### Work Hours

Approved work hours are 7 a.m. to 6 p.m., Monday to Friday but crews are working from 7 a.m. to 3:30 p.m. Occasional work may extend beyond the approved hours, due to unforeseen conditions, based on feedback from municipal officials.

Below is an overview of the active and upcoming work zones in Hudson and Sudbury for the next several weeks.

### Hudson

- In the inactive Massachusetts Bay Transportation Authority (MBTA) rail corridor, between Wilkins Street and Parmenter Road, crews are removing rails and ties and grading sections of the limits of work, which includes moving soils. From Parmenter Road to the Town line, crews are mainly focused on grading to prepare for forthcoming phases of construction.
- Off Forest Avenue, between Hudson Light & Power and the recently installed vault (MH1), one crew is installing conduit and will start backfilling the trench

next week. Construction activities in this area are off the roadway. Active construction will not occur on Forest Avenue until Spring 2023.

## Sudbury

- **In the inactive MBTA rail corridor**, clearing of vegetation started this week near the Sudbury Substation (163 Boston Post Road) moving west toward Bridge 127. Clearing activities in this segment are expected to last for several weeks followed by the installation of sediment and erosion controls. In early January, crews will begin removing vegetation at the Sudbury/Hudson Town line moving east toward Dutton Road.
- **Off Boston Post Road**, at the Eversource Sudbury Substation, G. Greene Construction, another Eversource contractor, will be working for several days this week inside the fence line and on Eversource property. G. Greene will not be working next week and will resume work on January 3, 2023.

---

## Typical Construction

Pictured is the work zone at Hudson Light & Power where crews are installing duct bank from the recently installed vault (MH1) toward Forest Avenue.
